## *New Product Introduction Feature*

### **EverGreen Creates Full Line of *Ever-Lite Select* Travel Trailers Perfect for the Economy and Value Minded Buyer**

***Ever-Lite Select is the EverGreen for Everybody!***

**Middlebury, Ind.**—[Evergreen Recreational Vehicles LLC](#), the leading innovator in eco-friendly, lightweight composite travel trailers, has re-engineered its full line of Ever-Lite travel trailers to provide economy minded and entry level campers with a true EverGreen quality at a very affordable price. The new [Ever-Lite Select](#) line is now the largest brand in the EverGreen lineup with 15 floor plans now available. Based on the original Ever-Lite series, there are eight lightweight travel trailers and seven deep slide travel trailers now available in *Ever-Lite Select* series--from 25 to 36 feet in length. The original Ever-Lite brand with full CompositTek™ construction is still available in nine floor plans.

### **Vacuum Laminated, Aluminum Framed Construction and a Composite Inner Shell Make the New *Ever-Lite Select* a Quality EverGreen at a More Affordable Price**

To lower the cost of the new *Ever-Lite Select* travel trailers EverGreen replaced composite materials with more affordable components. The brand retains the EverGreen quality.

- **Satin Finished Exterior Gel-Coat**—Built to be more affordable, the entire *Ever-Lite Select* line has a satin finished exterior gel coat replacing the high gloss composite exterior. Evergreen replaces additional composites with conventional materials throughout the coach to further reduce the cost.
- **Composite Inner Shell**—EverGreen has retained its innovative, lightweight Composite Inner Shell on the *Ever-Lite Select* that resist rot, mold and mildew inside. The Composite Inner Shell also lowers off-gassing of VOCs for a healthier camping experience.
- **Vacuum Laminated Construction**—EverGreen's vacuum laminated construction is bonded onto a fully welded and reinforced aluminum frame. The combination of the Composite Inner Shell, high density block foam and vacuum lamination result in added durability and higher R-values. The *Ever-Lite Select* is a true EverGreen at a more affordable price.
- **Deep Slide Models**—Deeper, 42-inch slide outs are above the wheel well to provide higher ground clearance on seven Deep Slide Models in the *Ever-Lite Select* series trailers. Six-inches deeper than the competition, Deep Slides provide residential living space inside these models. Slides are driven in all four corners with EverGreen's quality, four-point, gear-driven system to provide smoother operation and a tighter seal.

The *Ever-Lite Select* still incorporates high-tech composites, vacuum-laminated to a welded aluminum frame in a seamless, one-piece system that eliminates flex and vibration—still a more durable trailer with a higher resale value—but priced to sell!
