EverGreen Introduces 2012 i-Go Lite Travel Trailers and Fifth Wheels Designed for Lightweight Towing and Economy Minded Camping Budgets

Middlebury, Ind. —EverGreen's 2012 i-Go Lite travel trailers and fifth wheels offer families seeking a lightweight, easy towing trailer an affordable introduction into the innovative [EverGreen Recreational Vehicles](#).

i-Go Lite—Lightweight, Affordable Quality

The concept of the new [i-Go Lite](#) travel trailers and fifth wheels is to provide economy conscious camping families the opportunity to own a lightweight, quality-built EverGreen at a very affordable price. The i-Go is crafted with the same aluminum-framed, vacuum-laminated processes and 100-point quality control systems as all EverGreen products. Yet by limiting the amount of composite materials to a lightweight Composite Inner Shell, and producing a narrower, seven foot, six inch wide (7'6") trailer, EverGreen was able to dramatically reduce the price on the new i-Go Lite series of trailers. Now everyone can own a quality EverGreen product.

The Advantages of Owning an i-Go Lite by EverGreen

- **i-Go Lite is lighter weight and easier to tow** because of its narrower, seven-foot six-inch width (7'6"). With less wind resistance, the i-Go is designed to track smoothly behind smaller tow vehicles such as half-ton pickups or mid-sized SUVs. The entire i-Go Lite series travel trailers are less than 30 feet in length and weigh around 5,000 pounds. Fifth wheels weigh in fewer than 6,500 pounds.
- **Built better, yet more affordable** with a satin finished exterior gel coat, the i-Go still features EverGreen's innovative, lightweight composite inner shell to reduce rot, mold and mildew. Composites also lower off-gassing of VOCs inside for a healthier camping experience.
- **EverGreen's vacuum laminated composite construction** is bonded onto a fully welded and reinforced aluminum frame. The combination of composite materials and vacuum lamination result in added durability and higher R-values. The i-Go is a true EverGreen at a more affordable price.
- **Deeper, 42-inch slide outs are above the wheel well to provide** higher ground clearance. Six-inches deeper than the competition, i-Go Lite slides provide the living space of an eight foot trailer yet retain the towability of a seven and one half foot wide trailer. Slides are driven in all four corners with EverGreen's quality, four-point, gear-driven system to provide smoother operation and a tighter seal.

Eight Floor Plans are Now Available!

Five travel trailer floorplans are now available in the i-Go series. All five are less than 30 feet and weigh from 4600 to just over 5000 pounds.

The new i-Go Lite floorplans **G220RB** and **G236RBK** are both rear bath models with roadside, center, deep slides with mid-kitchens and front bedrooms. The over-sized dinette/sleeper in the slide out measures 84" by 42" to sleep two adults comfortably and has under-seat storage. Sofa models have storage underneath. In addition, the slightly larger **G236RBK** features a kitchen table inside and EverGreen's popular Campfire Kitchenette—a full service outside kitchen with cooktop, refrigerator and food storage curbside.

The **G239BH** sleeps six with a queen bed, large dinette that converts to a full sized bed and an additional twin "bunk house" in the rear of the camper. The EverGreen i-Go offers all these amenities in a unit under 5,000 pounds that can be towed with today's SUVs.

The model **G249RB** features a more open floorplan designed for entertaining with a large sofa bed in the slideout facing a dinette and a galley L-shaped kitchen with expanded counter space and kitchen storage.

The **G256BH** features a huge dinette and sofa slide out opposite the kitchen. Perfect for families with lots of kids, this floor plan sleeps up to eight with twin bunks tucked into the curbside, aft corner.

The largest of the i-Go Lite travel trailers, the **G269FK**, features EverGreen's popular front, L-shaped kitchen floor plan with loads of storage. A slide out jack knife sofa is opposite a dinette. Access the bedroom through the bath into in the rear of the coach.

Two New i-Go *Fifth Wheels* for 2012 Uniquely Designed for ½ Ton Trucks

The **G27RK-5** features a rear kitchen configuration with counter space and overhead storage across the entire rear of the coach. The large combo dinette and sofa slide out is opposite the kitchen. Access to the front bedroom is through a private bath on both fifth wheels.

The **G27RL-5** is a rear lounge floor plan perfect for entertaining with the slide out sofa and easy chairs aft. A dinette is opposite the galley style kitchen curbside.
